

# DUAL FROZEN DRINK MACHINE INSTRUCTIONS

Item # 1614

845.226.2447

- 1. STARTING MACHINE:** If you are using both hoppers, start the machine by pushing the left and right-side auger ON/OFF switches until **AUGER ON** appears. Next, turn on the left and right-side control switches (OFF, ICE or CHILL) until **ICE** appears.
- 2. ADD COLD WATER:** Then pour the desired flavors in from the top of the machine. Follow the mixing instructions. Depending on water and room temperature, allow about 60 to 120 minutes before serving.
- 3. USING BAR MIXES:** After pouring water and mixes into the machine, wait until the mixture becomes slushy to add alcohol (alcohol takes longer to freeze, so adding alcohol later will speed up the freezing process). Pour only half of the desired liquor to start with – then taste test and continue to add more alcohol until you reach the desired strength.
- 4. ADDING MORE PRODUCT:** When mixing blades become exposed, repeat mixing instructions. It will take about 30 to 45 minutes before you can start serving again. When adding product, slide the top of the hopper backwards.
- 5. WHEN FINISHED USING THE MACHINE:** Turn off the machine. Empty the hoppers. Add one gallon of warm water to each hopper and drain. Do this twice. This helps rinse out the machine. Do not do any other cleaning.

## HELPFUL TIPS

- Keep the machine in a cool area. This machine will not work well outside in temperatures over 75 degrees. If you are operating outside, make sure to place the machine in a shaded area and allow at least 3 to 4 hours to freeze.
- Do not add ice to this machine. This machine makes its own ice.

# DRINK MIXING INSTRUCTIONS

Item # 1614

845.226.2447

**\* ONE SET OF MIXES PER HOPPER:** All mixing instructions are for ONE hopper only.

Do not split amounts below into both hoppers.

- **SLUSHIES:** Pour 2 1/2 gallons of cold water directly into the empty hopper. Add one 64 oz. bottle of Frusheez Slush Mix. No mixing required. Allow 60 to 120 minutes to freeze.  
\*Will make approximately 35-45 (8oz) servings per hopper.
- **MARGARITAS:** Pour one 64oz bottle of MARGARITA CONCENTRATE (not included with rental) into the empty hopper. Add one and a half gallons of cold water (192oz). Allow concentrate and water to mix for approximately 60 to 120 minutes (or until slushy) before adding alcohol.
  - Mild: Pour one fifth (750mL) of white or gold tequila into hopper. Also add eight ounces of triple sec (about one quarter of a 750mL bottle).
  - Stronger: Pour one handle (1.75L) of white or gold tequila into hopper. Also add twelve ounces of triple sec (about one half of a 750mL bottle).Pour only half of the recommended liquor to start - then add more to desired taste.  
\*Will make approximately 35-45 (8oz) servings per hopper.
- **STRAWBERRY DAIQUIRIS:** Pour one 64oz bottle of STRAWBERRY CONCENTRATE (not included with rental) into the empty hopper. Add one and a half gallons of cold water (192oz). Allow concentrate and water to mix for approximately 60 to 120 minutes (or until slushy) before adding alcohol.
  - Mild: Pour one fifth (750mL) of light rum into the hopper.
  - Stronger: Pour one handle (1.75L) of light rum into the hopper.Pour only half of the recommended liquor to start- then add more to desired taste.
  - For non-alcoholic drinks use one and a half 64oz bottles of Strawberry mix and 2 gallons of cold water.
- **PINA COLADAS:** Pour one 64oz bottle of PINA COLADA CONCENTRATE (not included with rental) into the empty hopper. Add one and a half gallons of cold water (192oz). Allow concentrate and water to mix for approximately 60 to 120 minutes (or until slushy) before adding alcohol.
  - Mild: Pour one fifth (750mL) of light or gold rum into the hopper.
  - Stronger: Pour one handle (1.75L) of light or gold rum into the hopper.Pour only half of the recommended liquor to start- then add more to desired taste.
  - For non-alcoholic drinks use one and a half 64oz bottles of Pina Colada mix and 2 gallons of cold water.
